France Bizot

France Bizot takes her inspiration from our contemporary society in which the frantic thirst for instant images and the high-speed tempo of social media contrasts with the slowness and stillness of her drawings.

Her art provides a modern perspective on the age-old tradition of drawing, particularly in the way she brings vivacity and irreverence to the sobriety of vintage French books. She mixes the spirit of an unlicensed graffiti artist with that of a pop culture obsessive. Her drawings connect today's focus on image with a traditional inquiry into what lies beneath.

Soundwave, motion, shape, drapery, wind, sea, ocean floor... these are the "waves" that inspired France Bizot for these side by side works. Her drawings explore the relationship of stillness to movement, curves to line, and surface to depth.

France Bizot is a French artist living and working in Paris.
She is represented by Backslash Gallery.
